TB 43-PS-822, **The Preventive Maintenance Monthly Index of Online Articles** is an official publication of the Department of the Army, providing a reference tool for all Soldiers assigned to combat and combat support units to access PS Magazine articles published to its official .mil website. All referenced articles have been reviewed and approved by the agency responsible for the equipment, publication or policy discussed in any referenced article. Application of the information in those articles is encouraged but optional with the user. The use of product or company names does not constitute endorsement of those products, services or companies by the U.S. Army. The use of non-DoD hyperlinks, along with that content, does not constitute endorsement by the DoD or DA. Neither DoD nor DA exercises any editorial control over, and cannot vouch for, content on non-DoD websites.

PS: The Preventive Maintenance Monthly Index of Online Articles (ISSN 0475-2953)
is published monthly by the Department of the Army, Redstone Arsenal, AL 35898.

You are invited to send PS your ideas for improving maintenance procedures, questions on maintenance and supply problems and questions or comments on material published in PS.

8-Jun-22	Apache: Inspect Seat Belt and Harness for Correct Configuration	https://www.psmagazine.army.mil/News/Article/3056692/apache-inspect-seat-belt-and-harness-for-correct-configuration/	Mechanics, make a note that if you're working on the Apache Longbow, you need to check the seat belt and harness configuration.
14-Jun-22	All Aircraft: Be Mindful During Ground Handling Operations	https://www.psmagazine.army.mil/News/Article/3062378/all-aircraft-be-mindful-during-ground-handling-operations/	Mechanics, ground support mishaps shouldn't happen if you're doing things by the book—that is by applicable maintenance manuals and TM 1-1500-204-23-1 (Jul 92).
14-Jun-22	AH-64: Reprogramming the Mast Mounted Assembly	https://www.psmagazine.army.mil/News/Article/2880765/ah-64-reprogramming-the-mast-mounted-assembly/	The Apache helicopter has many complicated computerized parts. In the Jul 21 Apache newsletter, issue 96, it states that the mast mounted assembly (MMA) electronically erasable programmable read-only memory (EEPROM), NSN 1220-01-605-5217, requires reprogramming after specific fire control radar (FCR) maintenance tasks are accomplished. If this reprogramming doesn't occur, it could negatively impact the accuracy of the fire control radar. Read on to learn the details...
